9. Do you have any other comments to add to your evaluation?

*Please keep your comments constructive and professional, abiding by the Principles of Community*

- Andrew did a really good job at explaining why things were the way there are (going beyond just plugging in formulas, but explaining why they work)
- Andrew Paul is a wonderful lecturer and is clearly passionate in what he is teaching. He presents the materials which were covered in class, and adds a depth to it which leads to a deeper understanding of the topic at hand. If students ask questions, he is able to sufficiently give an answer and makes sure that students will succeed with the tools he has given them.
- This guy has a clear passion for math and really cares about the student understanding the concept and getting into every nook and cranny to make sure we understand why stuff happens. A++ TAVright here
